

SuiteMed™ IMS for Cardiology

A fully integrated EHR / Practice Management solution specifically designed to meet the needs of the Cardiovascular Practice

Performing rapid diagnosis and life-saving treatment are critical components of cardiovascular care – they can be cumbersome and challenging if your practice is not digital and electronically connected. Move your Cardiology practice to SuiteMed IMS EHR, for quick and accurate diagnosis and treatment of your patients' cardiology needs.

Cardiovascular Templates and Workflow

Automate documentation, complete exams and diagnostic tests quickly and easily with point and click Cardiology template content and workflow. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

From anywhere in the EHR you can order and review critical tests and lab results with just a few clicks. This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the cardiologist, connecting them to patients, payers, medical devices, pharmacies, labs and other health care entities regardless of the practice size, specialty and number of locations.

SuiteMed IMS, version 14 is an

Ambulatory EHR

SuiteMed IMS for the Cardiology Practice

- Simplify patient visits with cardiology-specific templates for faster, more comprehensive documentation, storage, and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency, and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials, and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements, and business analysis.
- Access patient information at the point of care, no more chart pulls, and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with integrated patient portal, and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies, and labs for referrals, orders and results.
- Local ongoing support from a national team of industry experts -- SuiteMed Authorized Partners, dedicated to serving the needs and interests of cardiologists.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for cardiology-specific tests, procedures, and disease management.

“ My bad-debt write-offs have been reduced over 90%. Pre-SuiteMed IMS, we had an average of \$80,000 per month outstanding in charges waiting for referral. Since implementation of SuiteMed IMS we now regularly maintain no more than \$400 per month. The Authorization tracking screen helps us in timely follow-up with the insurance companies. The billing module is great, in a way we now know what ensures timely payments. The aging reports help our billers set priority of follow-ups, making sure we work in the right areas. ”

Julie Ziehm

SuiteMed IMS Features

- **Special Procedures**

Users can define the various stages and medications involved in a specific procedure. Procedures requiring multi-tasking are easily documented and associated CPT codes are automatically updated in the Super Bill.

- **E-Prescribing and Prescriptions**

The flexible and comprehensive prescription module tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy and drug interaction, and contraindication checks.

- **Authorization / Referrals**

Reduce missing authorizations and claim rejections with authorization checking at Check-In and Charge Posting. Authorization requirements can be set by procedure and insurance criteria.

- **Quick documentation with Cardiology-specific Templates**

Monitor Congestive Heart Failure, CAD, hypertension, and more plus exchange clinical data for vital signs, stress tests, treadmills, and much more.

- **Plus so much more**

Scheduler, Patient Portal, Integrated Appointment Reminders, Auto Check-In, Check-In/Out, Lab Orders & Tracking, Letter Writing, My Tasks Dashboard, Health Maintenance Reminders, Dispensary, Document Management, Reports Preparation and Management, Fax Management, Scan Module, Billing and Collections, and Auto Form Filler.

The SuiteMed Difference

SuiteMed's Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why SuiteMed ensures your success with our local Authorized Partners, experienced in health IT and certified in our solutions.

SuiteMed Authorized Partners are with you all the way, from demonstrating SuiteMed IMS to implementation and beyond – your local single-source solutions partner. An Authorized Partner is always available for fast on-site or phone support, training and revenue improvement services so you can concentrate on practicing medicine not technology.

Cardiology templates allow for a significant reduction in the cost of dictation and transcription.

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Why piece together modules to meet meaningful use, select a certified Complete EHR such as SuiteMed IMS. According to CMS, eligible professionals, need to have all the capabilities in their selected EHR even if they're not using all the EHR capabilities.
