

# SuiteMed™ IMS for Chiropractors

## A fully integrated EHR / Practice Management solution specifically designed to meet the needs of Chiropractors

SuiteMed IMS EHR is an intuitive solution with advanced features enabling the Chiropractor to automate their inefficient manual processes and achieve a true paperless environment. The system integrates the entire care delivery process enhancing the healthcare experience for you and your patients.

### Chiropractor Templates and Workflow

Automate documentation, complete exams and diagnostic tests quickly and easily with point and click chiropractor template content and workflow. Templates can be easily customized by the provider, even on the fly, to suit individual preferences while allowing them to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the chiropractor, electronically receive and send referrals, review faxed lab reports and import photographs. This allows easy annotations directly to the patient visit on images and photographs at the point of care. Order and review lab results from anywhere in the EHR. At the end of the day documentation and letters are completed and sent. SuiteMed IMS EHR allows you to leverage technology to better manage your practice and your patients' health.

## SuiteMed IMS for Chiropractors

- Simplify patient visits with chiropractor-specific templates for faster, more comprehensive documentation, storage, and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency, and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials, and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements, and business analysis.
- Access patient information at the point of care, no more chart-pulls, and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with integrated patient portal, and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities for referrals, consults and communication between patient's various health care providers.
- Local ongoing support from a national team of industry experts -- SuiteMed Authorized Partners, dedicated to serving the needs and interests of the chiropractor.
- Designed for the solo and small to large clinic with multiple providers and locations, SuiteMed IMS is easy, intuitive, and requires significantly less training than more complex systems.
- Deliver patient education materials for chiropractor-specific tests, procedures, and disease management.

### Up to \$44,000

The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, (Chiropractors are eligible) as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology.

#### Purchase with Confidence

## Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Why piece together modules to meet meaningful use, select a certified Complete EHR such as SuiteMed IMS. According to CMS, eligible professionals, need to have all the capabilities in their selected EHR even if they're not using all the EHR capabilities.
