

SuiteMed™ IMS for Oncology

A fully integrated EHR / Practice Management solution specifically designed to meet the needs of Oncology

SuiteMed IMS Oncology EHR is an intuitive solution with advanced features enabling the Oncologist to automate their inefficient manual processes and achieve a true paperless environment. The system integrates the entire care delivery process enhancing the healthcare experience for you and your patients.

Oncology Templates and Workflow

Automate documentation, complete exams and diagnostic tests quickly and easily with point and click oncology template content and workflow. The template editor lets physicians customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the oncologist, electronically receive and send referrals, review faxed lab reports and import photographs. This allows easy annotations directly to the patient visits on images and photographs at the point of care. Order and review lab results from anywhere in the EHR. At the end of the day documentation and letters are completed and sent. SuiteMed IMS EHR allows you to leverage technology to better manage your practice and your patients' health.

Review clinical data with graphical charts identifying patients not meeting clinical measures quickly and easily. Tasks, reminders, alerts and letters can be generated to improve meaningful use status.

Registration begins Jan. 3, 2011. Participate now to get the maximum incentive payments!

SuiteMed IMS Features for Oncology

- **Oncology-specific Templates**

Documenting conditions and symptoms is faster and more accurate using intuitive templates. Access comprehensive clinical content — document a complete office visit, including pre- and post-op appointments, with user-friendly, oncology-specific templates.

- **Quick Chemotherapy Treatment Documentation**

Predefined treatment protocols with automated CPTs.

- **Chemotherapy Scheduling**

Save time with a complete chemo therapy schedule for the entire course of treatment.

- **E-Prescribing and Prescriptions**

The flexible and comprehensive prescription module tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy and drug interaction and contraindication checks.

- **Authorization / Referral Tracking**

Reduce missing authorizations and claim rejections with authorization checking at Check-In and Charge Posting. Authorization requirements can be set by procedure and insurance criteria.

- **Treatment Comparison**

Auto updated flow sheet for Chemo cycles; Review patient's Chemo cycles, lab results and vital signs on a single screen. Make evidence based clinical decisions regarding patient treatment by easily comparing multiple visits.

- **Document & Image Management**

Condense and organize files into a user-friendly, easily accessible digital document file cabinet. Organize documents with customized folder tabs, the integrated fax management module allows you to fax from the system, scan in documents, images, driver licenses, insurance cards, and more.

- **Lab Ordering, Reviewing and Tracking**

Supports HL7 interface so you can send or receive diagnostic lab orders electronically. Customized test templates and pre-printed order forms. Pre-import checking. Comparative and graphical representation of lab data saving physicians' time.

- **Plus so much more**

Scheduler, Patient Portal, Integrated Appointment Reminders, Auto Check-In, Check-In/Out, Lab Orders & Tracking, Letter Writing, My Tasks Dashboard, Health Maintenance Reminders, Dispensary, Document Management, Reports Preparation and Management, Fax Management, Scan Module, Billing and Collections, and Auto Form Filler.

The SuiteMed Difference

SuiteMed's Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why SuiteMed ensures your success with our local Authorized Partners, experienced in health IT and certified in our solutions.

SuiteMed Authorized Partners are with you all the way, from demonstrating SuiteMed IMS to implementation and beyond — your local ongoing single source solutions partner. An Authorized Partner is always available for fast on-site or phone support, training and revenue improvement services so you can concentrate on practicing medicine not technology.

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Why piece together modules to meet meaningful use, select a certified Complete EHR such as SuiteMed IMS. According to CMS, eligible professionals, need to have all the capabilities in their selected EHR even if they're not using all the EHR capabilities.
