

SuiteMed™ IMS for Pain Management

A fully integrated EHR / Practice Management / Portal solution specifically designed to meet the needs of the Pain Management Practice

SuiteMed IMS is one solution, integrated with IMS Clinical (Ambulatory EHR), IMS Manager (Practice Management), and IMS Care Portal offering a full range of customizable, easy-to-use features – helping your practice save money, boost revenue, and provide a higher standard of patient care. IMS Links connects the specialist to the patient, payers, medical devices, pharmacies, labs and other health care entities regardless of the practice size, specialty and number of locations.

We understand the pain management specialist and your practices specific needs. SuiteMed IMS is designed to meet those needs and incorporates detailed forms for quick capture of Worker Compensation or Personal Injury related information, a comprehensive clinical database, advanced electronic super-bill, and templates customized for the pain management specialty.

Pain Management Templates and Workflow

SuiteMed IMS will streamline the entire documentation and patient charting process with our robust Pain Management conditions- and symptoms-based templates which come pre-loaded and include history of present illness, compliants, review of systems, medication prescribing, CPT coding, and more. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand.

SuiteMed IMS, version 14 is an

Ambulatory EHR

SuiteMed IMS for Pain Management

- Simplify patient visits with pain management-specific templates for faster, more comprehensive documentation, storage, and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency, and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials, and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements, and business analysis.
- Access patient information at the point of care, no more chart-pulls, and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with the integrated IMS Care Portal, and in-office kiosk.
- Achieve interoperability and connectivity with IMS Link to other health care entities for referrals, consults and communication between patient's various health care providers.
- We offer local ongoing support from our team of industry experts -- as SuiteMed Authorized Partner, we are dedicated to serving the needs and interests of the pain management practice.
- Designed for the solo and small to large clinic with multiple providers and locations, SuiteMed IMS is easy, intuitive, and requires significantly less training than most other systems.
- Deliver patient education materials for specific pain management symptoms, such as back pain, bone pain, fracture, headache, lower-upper limb pain, myalgia, work restrictions, and more.

Up to \$44,000

The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, (Chiropractors are eligible) as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology.

Purchase with Confidence

SuiteMed IMS is guaranteed to meet all of the ARRA meaningful use criteria and requirements or your money-back. How can we guarantee you'll be qualified for HITECH Act incentive payments?

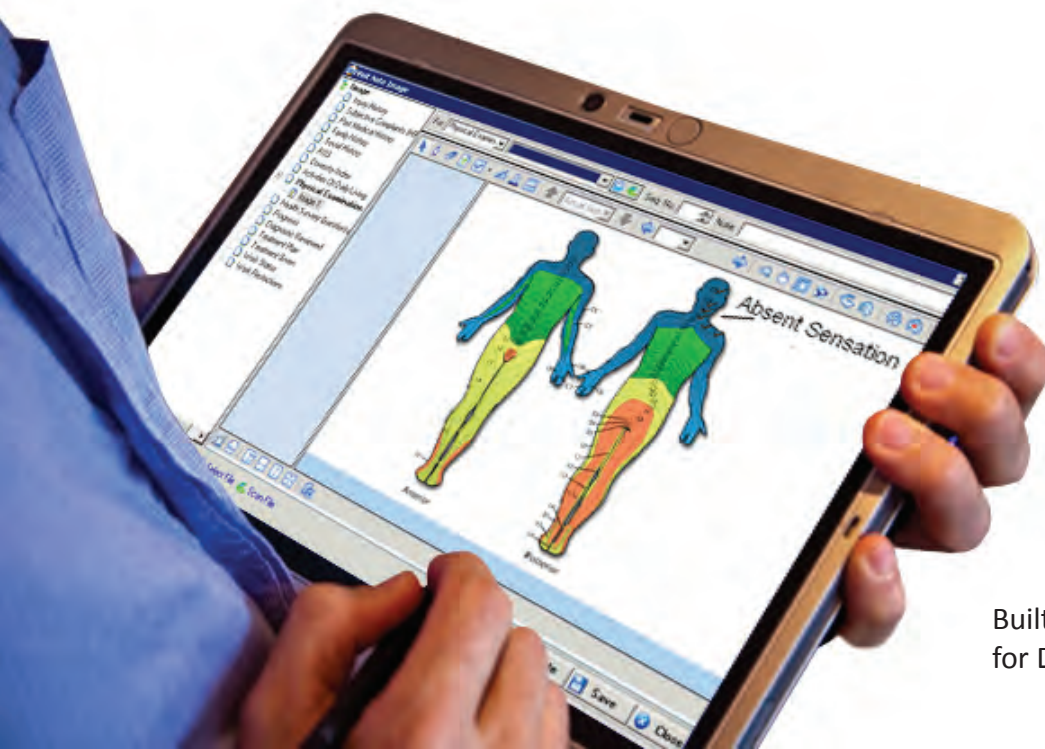

CCHIT Certification

SuiteMed IMS has received the most current CCHIT certification, and, as of September 30, 2010, the most recent version was recognized by CCHIT as a Stage 1 Meaningful Use certified Complete EHR with ONC-ATCB 2011/2012 Certification, meeting all criteria published by the U.S. Department of Health and Human Services (HHS) in the Final Rule.

Easily Become a Meaningful User

SuiteMed IMS features a unique Meaningful Use Dashboard that quickly identifies meaningful use deficiencies. Review clinical data with graphical charts identifying patients not meeting clinical measures quickly and easily. Tasks, reminders, alerts and letters can be generated to improve meaningful use status.

SuiteMed IMS Features for Pain Management

• Pain Management-specific Templates

Documenting conditions and symptoms is faster and more accurate using intuitive templates. Access comprehensive clinical content — document a complete office visit, with user-friendly, Pain Management-specific templates streamline exams.

• Auto Check-In

Auto Check-In Kiosk features let the patient Check-In automatically. This feature reduces workload and helps in managing a high patient flow.

• Authorization / Referral Tracking

Reduce missing authorizations and claim rejections with authorization checking at Check-In and Charge Posting. Authorization requirements can be set by procedure and insurance criteria.

• Prescriptions and Drug Dispensing

The flexible and comprehensive prescription module easily tracks medications and refill history. Complete with drug education integration, dosing, allergy and drug interactions, and contraindication checks to ensure the safety and well being of each patient. Drug Dispensary is integrated with the prescription and billing modules. Dispensing accuracy is achieved with bar-code verification provisions to easily monitor drug inventory.

• Document & Image Management

Condense and organize files into a user-friendly, easily accessible digital document file cabinet. Organize documents with customized folder tabs, the integrated fax management module allows you to fax from the system, scan in documents, images, driver licenses, insurance cards, and more.

• Lab Ordering, Reviewing and Tracking

Supports HL7 interface so you can send or receive diagnostic lab orders electronically. Customized test templates and pre-printed order forms. Pre-import checking. Comparative and graphical representation of lab data saving providers' time.

• Integrated, Single Database

SuiteMed IMS is truly an integrated EHR and Practice Management solution featuring: no conflicting or redundant data, a single database, easily access patient information with a single click across all applications.

• Additional Features and Benefits of SuiteMed IMS

- Client-Server or Web-based EHR options
- E&M Coding Assistance
- Local professional implementation, training, support and personal services
- Lab Interface (Quest, LabCorp, etc.)
- Billing, Scheduling, Auto Check-In, Kiosk, Dashboard Reports, Referral Tracking
- Document & Image Management, Product/Supplement Dispensary
- Tablet PC Enabled, Voice, Stylus, Mouse or Keyboard data entry
- Online Patient Portal
- Plus much more

SuiteMed IMS Difference

SuiteMed's Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why SuiteMed ensures your success with our local Authorized Partners, experienced in health IT and certified in our solutions.

SuiteMed Authorized Partners are with you all the way, from demonstrating SuiteMed IMS to implementation and beyond — we're your local ongoing single source solutions partner. We're always available for fast on-site or phone support, training and revenue improvement services so you can concentrate on practicing medicine not technology.

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Why piece together modules to meet meaningful use, select a certified Complete EHR such as SuiteMed IMS. According to CMS, eligible professionals, need to have all the capabilities in their selected EHR even if they're not using all the EHR capabilities.
